

# DPC 817

**Brand Name:**     **Reverset**

DPC 817, also known as Reverset, RVT, or D-D4FC, is a type of medicine called a nucleoside reverse transcriptase inhibitor (NRTI). NRTIs work by blocking reverse transcriptase, a protein that HIV needs to make more copies of itself.

## **HIV/AIDS-Related Uses**

---

DPC 817 is an investigational medicine that is not yet approved by the FDA for use outside of clinical trials. It is being studied for the treatment of HIV infection. This medicine does not cure or prevent HIV infection or AIDS and does not reduce the risk of passing the virus to other people.

## **Dosage Information**

---

DPC 817 comes in enteric coated tablets and buffered oral solution.

## **Contraindications**

---

Individuals should tell a doctor about any medical problems before taking this medicine.

## **Possible Side Effects**

---

Along with its desired effects, DPC 817 may cause some unwanted effects. Further study is needed to determine the possible side effects of DPC 817. Individuals should tell a doctor if they experience side effects that are bothersome.

## **Drug and Food Interactions**

---

A doctor should be notified of any other medications being taken, including prescription, nonprescription (over-the-counter), or herbal medications.

## **Clinical Trials**

---

For information on clinical trials that involve DPC 817, visit the ClinicalTrials.gov web site at <http://www.clinicaltrials.gov>. In the Search box, enter: DPC 817 AND HIV Infections.
